

# Welcome

Dear Students and Parents,

Welcome to the American School of Kuwait's 2009 Summer School. Our mission is to provide students in our educational programs with an academically challenging and productive environment that will enable them to further their studies under the direction of experienced and qualified educators.

Thank you for making the American School of Kuwait your choice for Summer Education.

Best Regards,

Daniel Kilback

## Course Descriptions

### High School Credit Courses

#### **English Literature (Freshmen & Sophomores)**

This course provides opportunities for students to apply appropriate reading strategies to enhance reading skills, literary appreciation, and analysis of literary and structural elements of literature.

#### **English Language (Freshmen & Sophomores)**

This basic grammar course will focus on parts of speech, punctuation, spelling skills, sentence structure, reading responses, a novel study, and essay writing format.

#### **English Literature (Juniors & Seniors)**

This course provides opportunities for students to apply appropriate reading strategies to enhance reading skills, literary appreciation, and analysis of literary and structural elements of literature.

#### **English Language (Juniors & Seniors)**

This basic grammar course will focus on parts of speech, punctuation, spelling skills, sentence structure, reading responses, a novel study, and essay writing format.

#### **Biology**

Biology is a course designed to study in-depth subjects in Life Science. Themes running throughout the Summer Session are reproduction and inheritance, development, structure and function, inter-relationships ecology and sciences as it relates to society.

#### **General Science**

This is a general science class for grades 9 - 12. It will cover scientific inquiry and relate science to our everyday world. Emphasis will be placed on laboratory work.

#### **Algebra 1**

This course will include a review of general Algebra concepts including expressions, equations factoring and graphing.

#### **Algebra 2**

This course extends coverage of traditional Algebra 1 concepts. The applications of algebraic skills in a variety of problem-solving situations are included. The course is appropriate for students who have a solid foundation in Algebra 1.

### **Geometry**

This is an applied geometry course designed for students who either need support in geometry or who do not plan to pursue careers in the scientific or engineering fields. Emphasis will be placed on concepts of geometry, and their applications to real life situations.

### **Classical History**

This course will focus on a comprehensive look at the societies of ancient Egypt, Greece, and Rome, with an emphasis on their contributions to the modern world.

### **Modern History**

This course covers the Renaissance, the Scientific Revolution, the Industrial Revolution, Nationalism, Imperialism, and the World Wars.

### High School Non-Credit Course

#### **Pre-Biology**

Pre-Biology is a course designed to provide a jump start for students preparing to take Biology at the High School level.

#### **Beginner's ESL**

This course is designed for students who are new to English as a Second Language.

#### **Advanced ESL**

This course is designed for students who have a firm grasp of English as a Second Language but who desire to improve their speaking skills and overall comprehension.

### Middle School Support Courses

#### **Mathematics Support/Pre-Algebra**

There will be an emphasis on reviewing basic computational skills (addition, subtract, multiplication, and division) as well as an introduction to the fundamentals of Algebra.

#### **Reader's/Writers Workshop**

This course is designed for Middle School students who wish to improve their English language skills. The focus will be on group work to develop speaking, listening, reading comprehension and language skills. Active participation is required.
